CITATION MACHINE

Serving Students & Teachers
K-12, College, & University

Citation Machine is an interactive web tool designed to assist **high school, college, and university students**, their teachers, and independent researchers in their effort to respect other people's intellectual properties. To use Citation Machine, simply...

1. Click the citation format you need and then the type of resource you wish to cite,
2. Complete the Web form that appears with information from your source, and
3. Click **Make Citations** to generate standard bibliographic and in-text citations.

The primary goal of this tool is to make it so easy for **high school, college, and university students** and other researchers to credit information sources, there is virtually no reason not to -- because **SOMEDAY THE INFORMATION THAT SOMEONE WANTS TO USE, WILL BE YOURS.**

Warning: There are many nuances to how citations are formed, and this software may not pick up all of the circumstances that influence a citation's proper format. Because of the myriad of characteristics in information sources, neither David Warlick, nor The Landmark Project, can fully guarantee the accuracy of citations generated by this tool.

If you have questions about the proper citation of these or other source types, consult with your local copy of:

- [MLA Handbook for Writers of Research Papers: 6th Edition](#) or
- [Publication Manual of the American Psychological Association: 5th Edition.](#)

There will be copies in your school or public libraries.
